

Grand River Dam Authority
Schedule OLB-175
Outside Lighting
Effective 01/01/2010

Application of this Rate

This service is available to all Customers where a power source of 13,800 volts, or lower, is available for power to the light.

The Authority will furnish, operate and maintain one 175 watt mercury vapor light with the necessary operating power, provided that only one span of conductor from the source of power per light will be provided by the Authority.

The power source will be from the Customer's low voltage service on the Customer's side of the billing meter.

Rate: \$13.50 per light, per month
