

RFQ 2381 – Questions & Answers

(Answers in red)

1. Do you have an estimated needed delivery date?
There is no specified date, just the sooner the better. Lead times will be included as a consideration during our evaluation.
2. Do you have the RS or another manufacturer part number?
There are no part numbers for these products. This request is for H3 & H4 Wood Poles or the equivalent Spun Concrete poles.
3. Will you accept an alternative pole type for this solicitation?
This would have to be a technical determination from the project team during evaluation. This is not a sole brand request, so equivalents will be considered. Please include the technical data/specifications of the item you are quoting if submitting an alternative.
