Rebuild GREC Unit 2 Cooling Tower Gear Boxes

Q&A

Q: Do you want a quote replacing the bearings, seals, etc., knowing the price could be 2 or 3 times more?

A: All vendors are required to submit bids based on a worst-case scenario to ensure consistency throughout the bidding process and reduce the likelihood of change requests.

Any items determined to be unnecessary following inspection will be excluded from the final repair cost.

The necessary provisions can be incorporated into the Service Agreement to support this approach.
