

RFQ 4058 – NEW FLY ASH BLOWER FOR GREC

Q&A

Q: Can you please provide a Spec Sheet for Model #9CDL23P?

A: Do not have spec sheet.

Q: Do you have another identifier number other than the Model Number? Such as a part number? Is this part a STOCK COAL FEEDER THAT THIS BELONGS TO?

A: No other identifier number. It is our ash system blower.

Q: May we please request confirmation that these measurements and dimensions match the Fly Ash Blower you're requesting replacement for? Length – 49.5 inches, Width – 25.75 inches, Height – 23 inches, Inlet Port Size – 10 Inches, Inlet Port Connection Type – Flange, Inlet Port Outer Diameter – 16 inches, Discharge Port Size – 8 inches, Discharge Port Connection Type – Flange, Discharge Port Outer Diameter – 13.5 inches

A: With shaft length included 49.5 inches is correct. All other dimensions are correct.

Q: Please confirm that the 10 inch inlet is a flanged connection with a 16 inch outside diameter and that the 8 inch discharge is a flanged connection with a 13.5 inch outside diameter.

A: Correct

Q: Please confirm that the proposed unit will be a direct dimensional and connection match to the existing installation, without requiring modifications to the existing piping or equipment.

A: The above dimensions are correct.

Q: Please confirm that any deviations from the specified dimensions or connections are clearly identified and submitted for review prior to fabrication or shipment.

A: The above dimensions are correct.

Q: What is the required CFM?

A: 2020 CFM at 1800 RPM

Q: What is the operating pressure/vacuum?

A: 5 to 15 normal pressure lifts safety at 17 lbs.

Q: Can you please provide the Driver HP?

A: 150 HP

Q: Can you please provide the Gas/Service (air, biogas, process gas, etc) this part requires?

A: Air

Q: Is this bare shaft blower a replacement on an existing PD package? Or are you looking to size a new skid?

A: Existing skid
